SUMMARY

Software Engineer with **3+ years** shipping SaaS products for U.S. startups across the **JavaScript / TypeScript** stack (React, Node.js, GraphQL). Now working AI-native: I build my team's **agent tooling** — custom skills, PR-review and deploy agents, an **MCP server** — and debug **LLM-driven product features**. I own features end to end and have led backend and data migrations, working fully remote.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, SQL
Frontend	React, Next.js, Redux, Tailwind CSS
Backend	Node.js, NestJS, GraphQL, REST APIs, Prisma, PostgreSQL, MongoDB
Cloud & Data	AWS Serverless, dbt, Metabase, Fivetran
AI / GenAI	LLM agents (Cursor, Claude), MCP servers & clients, prompt engineering, AI-assisted code review

PROFESSIONAL EXPERIENCE

Software Engineer — [Embeddables](#) · USA (Remote) Mar 2026 – Present

- **Lead the team's AI-assisted development platform:** authored reusable agent skills and custom agents (PR review, production deploy, change tracing) for Cursor and Claude.
- **Built the company's remote MCP server** — Next.js API routes, stateless Streamable HTTP, OAuth 2.0 + PKCE — exposing ~10 authenticated tools that give Cursor and Claude access to project data without repo access.
- Designed a **trace-based debugging workflow** for the production LLM assistant, correlating execution traces, tool selection, and parameters to root-cause incorrect responses.
- Ship features across the platform and integrate EHR/EMR systems into client-facing solutions for U.S. healthcare clients.

Frontend Engineer — [Embeddables](#) · USA (Remote) Mar 2025 – Mar 2026

- Delivered custom web solutions and advanced UI components for clients on the company's low-code platform (JavaScript, CSS).
- Supported teammates on complex implementations, including API integrations and technical troubleshooting.
- Integrated EHR/EMR systems into client-facing healthcare solutions.

Full Stack Software Engineer — [Trades.org](#) · USA (Remote) Mar 2023 – Feb 2025

- Built frontend and backend features for SaaS platforms with React, Node.js, GraphQL, and PostgreSQL; created a reusable Storybook component library and migrated the site to TypeScript.
- **Led the backend migration** from PostgreSQL to MongoDB and contributed to a microservices architecture with Apollo Federation.
- Shipped a subscription and billing system with Stripe; migrated authentication from Auth0 to Clerk.
- Led a Business Intelligence initiative with Marketing (dbt, Metabase, Starburst, Fivetran).

Full Stack Teaching Assistant — [SoyHenry Bootcamp](#) · Buenos Aires, Argentina Sep 2022 – May 2023

- Mentored students in the Full Stack Web Development program (debugging, architecture, pair programming) and proposed improvements to internal processes.

SELECTED PROJECTS

Pokémon Quiz — real-time multiplayer word game with accounts and a cross-device leaderboard.

React · TypeScript · Zustand · Node.js · Socket.IO · PostgreSQL · [pokemon-quiz.lausofimarce.workers.dev](#)

Spotify Lyrics PiP — floating, always-on-top desktop window with time-synced Spotify lyrics.

Electron · Node.js · OAuth PKCE · GitHub Actions · [github.com/Azrux/spotify-lyrics-pip](#)

Countries! — SPA to browse and filter world countries, with i18n and light/dark theming.

React · TypeScript · [countries-no-db.onrender.com](#)

EDUCATION

Henry Bootcamp — Full-Stack Web Development · 2022

LANGUAGES

English (professional) · **Spanish** (native)
